2. Organization Overview

Mumbai Metropolitan Region Development Authority (MMRDA) was set up on the 26th January, 1975 under the Mumbai Metropolitan Region Development Authority Act, 1974 by the Government of Maharashtra as an apex body for planning and co-ordination of development activities in the Mumbai Metropolitan Region comprising of Mumbai and its influence area.

The Authority declared under the act is a highest policy making body, having perpetual succession and a common seal with power, subject to the provisions of the Act, to acquire, hold and dispose of property, both moveable and immovable and to contract and to sue and be sued in its corporate name. At the apex is the Authority presided by the Minister of Urban Development Department, presently the Chief Minister. At the second and intervening tier is the Executive Committee presided by the Chief Secretary to the State Government. The third tier is occupied by the Metropolitan Commissioner assisted by the Additional Metropolitan Commissioner and other officers.

Organizational Overview- Snapshot

MMRDA prepares plans; formulates policies and programs; implements projects and helps in directing investments in the Region. In particular, it conceives, promotes and monitors the key

projects for developing new growth centers and brings about improvement in sectors like transport, housing, water supply and environment in the Region.

3. Project Background

MMRDA has undertaken number of initiatives under the e-Governance umbrella towards computerization in last 2 years. As result of initiatives MMRDA has its own Web portal and e-Tendering application, Digitized records, Integrated LAN, Wi-Fi & MPLS connectivity between offices. While a fair amount of progress has been made in this computerization initiative, there is ample opportunity for improvement. GIS is among one such initiative envisaged by MMRDA in implementing its vision for having a comprehensive eGovernance solution.

A GIS (Geographic Information System) is a system for management, analysis, and display of geographic knowledge, which is represented using a series of information sets such as maps layers (e.g., parcels, zoning, streams, wetlands, road networks, utilities, infrastructure, etc.), geographic data sets, processing and work flow models, data models, and metadata. A GIS can produce information that answers specific questions and allows you to share that information with others. By visualizing relationships, connections, and patterns in data, you can make informed decisions at the urban planning level and increase efficiency throughout the organization.

The basic goals and benefits of GIS include:

- Building a shared GIS database available to all divisions/departments.
- Providing better access to locational information for decision-making.
- Improving communication and cooperation between divisions/departments.
- Increasing efficiency in current ULB operations.
- Providing analytical mapping capabilities not currently available.
- Automating and standardizing records management for map and MIS data.

4. Current Situation:

The MMRDA has had a long track record with implementing and utilizing GIS technology in Planning Division. It has been limited to this one division without the benefit of participation by other divisions and agencies which could benefit from it. The Planning Division owns GIS & Remote Sensing software i.e. ESRI ArcGIS Desktop and ENVI and GIS data layers which consist of administrative boundary, environmental, infrastructure and heritage. Sources of this data include maps digitized in-house or by the third party vendor and obtained by the MRSAC, NRSA etc. This is only a partial listing of sources and many layers were derived from these. Most of the work with the GIS has been to support the planning activities of the division. The

level of accuracy for this data is considered to be useful for planning purposes only, except for the satellite images and topographic data, which can be used for preliminary analysis.

Several other divisions have started to use some of the data in the form of static/hardcopy maps from the Planning Division. These include Town & Country Planning, Land Cell, Water Supply Resource Management and Transportation & Communication division.

The need for inter-divisional coordination has also increased the need for expansion of GIS into other divisions. The demand for GIS data and services has been growing rapidly since past few years.

5. Purpose of EOI

This document is only a request for information and not request for proposal. This EOI has been prepared by MMRDA to invite Expression of Interest (EOI) from Bidder for the Enterprise Web GIS Solution.

Bidder are required to recommend the complete solution for the Enterprise Web GIS solution will all the details of the components for GIS to be implemented at MMRDA with proper justification viz., efficiency, operability, features involved, maintainability, support from Bidder etc. The proposed solution must have provision for data migration of existing database to the proposed database.

6. Scope and Requirements

The brief scope of work envisaged by MMRDA for Implementation of Enterprise GIS Solution is as given below

1. GIS Ecosystem assessment & Setup

- a. Assessment of MMRDA with respect to GIS readiness & Collection of Existing Information
- b. Creation of Geo-Spatial 3D data with complete asset & utility mapping of the area of interest for both surface and sub-surface
- c. Migrating existing data available at MMRDA in the new centralized GIS database along with necessary data updation

2. Commissioning of Enterprise GIS platform along with Enterprise GIS portal

- a. Set up of necessary IT infrastructure for GIS
- b. Creation of spatial layers based on mapping/ground verification and physical survey

- c. GIS web based Planning, Monitoring System and MIS reporting System
 - d. Developing GIS based Workflows, templates, user rights etc.
 - e. Hosting of the proposed solution
- 3. GIS based Apps development on multiple environments (iOS, Windows, Android etc.)**
- The application is expected to realign and fit to the smart mobile devices (iPhone/iPad, Android devices, Windows devices etc.). The design shall be decomposed to responsive HTMLs which will be compatible with latest versions of browsers and all smart devices.
- 4. Third Party Integration with existing Modules such as Building Plan Approval System, ERP etc.**
- 5. Deployment of GIS staff for a period of 5 years, Establishment of GIS cell in IT cell at MMRDA**
- 6. Capacity Building and Training**
- 7. Annual Maintenance contract (AMC) of the proposed solution for 5 years**
